RainBrain

The smart blue-green roof

- 
Healthier green roofs
 - RainBrain monitors and predicts the vegetation's health
 - Waters vegetation automatically when needed
- 
The best of IoT and analytics combined
 - Vegetation sensors, solar panel and LoRaWAN
 - Weather data, machine learning and modeling
 - RainBrain insights and controls through a mobile app
- 
Optimized water availability
 - RainBrain analyses the current and future water availability
 - Anticipates on extreme weather; stores water to survive droughts, empties buffers to prevent floods

IoT and Edge: Instruments, Priorities and Partnerships

WHEN: February 25, 2021 @ 9:30 am – 12:30 pm Calendar

WHERE: Online

KEY EVENT NGIOT EVENT

The purpose of the workshop is to take stock and consolidate on the key messages from the previous workshops on IoT and Edge computing, organised by the Horizon 2020 project NGIoT, held on [11 September](#) and [7/8 December 2020](#).

NGIoT invites European industry and the public sector to reflect on the results from these workshops and convey their position or provide a spontaneous feedback on the role of Edge Computing as they experience it in their relevant sectors. Feedback could be provided orally or through quote and/or expression of interest in supporting the future strategic discussion on Edge Computing at the European level.

We welcome your vision
