

ONE6G ASSOCIATION AND DIGITAL FOR PLANET SIGN MEMORANDUM OF UNDERSTANDING TO BOOST THE SUSTAINABLE DEVELOPMENT OF NEXT-GENERATION NETWORKS

10.11.2023

The one6G Association and Digital for Planet have signed a Memorandum of Understanding (MoU) to promote research, knowledge exchange, and the sustainable development of technologies.

The collaboration between the one6G Association and Digital for Planet marks a significant milestone in the pursuit of advancing technology in a sustainable manner. With the signing of a Memorandum of Understanding (MoU), both organizations commit to fostering research and facilitating the exchange of knowledge. The focus extends beyond technological advancement to emphasize sustainable development, underlining a shared dedication to responsible innovation. This partnership represents a synergy of efforts towards creating and promoting technologies that not only push the boundaries of progress but also contribute positively to the well-being of the planet. Through collaborative initiatives, the one6G Association and Digital for Planet aim to be instrumental in shaping a future where technology and sustainability go hand in hand.

The one6G envisions a future wherein the capabilities of 6G technologies and solutions are harnessed to unlock the potential of smart connectivity. This envisioned future sees smart connectivity as a driving force, fostering a development that is not only secure and resilient but also sustainable for our economy and society.

Digital for Planet works in line with the priorities set within the Digital Decade path, the European Green Deal and Sustainable Development Goals to support Europe's climate neutrality and establish a sustainable digital future all around the globe.

Both organizations anticipate positive outcomes from this collaboration and hope it will further the advancements in the wireless communication industry.

ABOUT ONE6G ASSOCIATION

The one6G Association is a non-profit and independent association and aims to evolve, test and promote next generation cellular and wireless technology-based communications solutions. By supporting global 6G research and standardization efforts, the goal is to accelerate its adoption and overall market penetration, while addressing societal and industry-driven needs for enhanced connected mobility. This with the ambition to speed up the development of new services and applications in domains such as advanced autonomous driving, advanced manufacturing, advanced wireless e-health, remote education etc. For more information, please visit [one6G website](https://www.one6g.org).

ABOUT DIGITAL FOR PLANET

Digital for Planet stands as a non-profit organization, fostering collaboration among digital innovators, researchers, public authorities, civil society, and engaged citizens. Its collective efforts are dedicated to harmonizing digital transformation and sustainability, creating a community-driven initiative. Comprising diverse organizations and individuals, Digital for Planet is committed to realizing a digitally-empowered society that ensuring equal opportunities for all while steadfastly working to rescue and protect our environment. At the core of its mission lies the ambition to actualize the twin transition of green and digital, envisioning a future where these realms seamlessly coexist for the benefit of society and the planet.
